SMD COUNTRY INDEX

The SMD Country Index provides you with essential trademark legal information for almost 200 countries.

Thanks to our large network of trademark attorneys, SMD Group has gathered valuable details on trademark regulations for almost every country in the world, such as registration proceedings, opposition periods, renewal grace periods, use requirements, and application fees. We make this knowledge available to our clients and peers on our website.

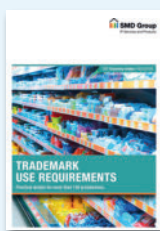

With further publications, we cover specific aspects of trademark practices and management across countries more comprehensively. The guides were compiled with the help of local legal experts. They serve as quick reference for trademark owners and legal representatives when entering or managing trademarks in foreign markets.

Note:

With our free newsletter you stay tuned on the latest amendments in international trademark laws.
